

U.S. Marine Aquaculture Collaborative Communications Strategy

Help us develop a collaborative strategy to facilitate the distribution of accurate information about marine aquaculture to consumers, regulators, policy makers, and the public.

We welcome your participation in a brief stakeholder update at Aquaculture 2019:

March 10, 2019
1:30 p.m. – 3:00 p.m.
Riverview 2

We need all hands on deck!

Scientists from academic, government, and nongovernment institutions can help provide fact sheets and the latest information from aquaculture science and research. **Seafood suppliers** are the connective tissue between the sources (farms and fisheries) to the chefs and retailers and ultimately the consumers. **Farmers** are the front lines and their stories and experiences will play an important role. We need input and participation from all of these stakeholders.
